Who We Are

At KI, we believe knowing our customers helps us serve you better. So we listen, observe and develop an understanding of your unique needs. Nothing gives us more satisfaction than helping you make smart furniture decisions.

OUR FOUNDATION

The metal chair was KI's flagship product in 1941. Innovative for its time, it brilliantly answered the call for seating that was portable, stackable, durable and affordable. KI recognized the market's need and responded with a welcome solution.

The KI folding chair symbolizes a long legacy of listening to our customers. Our insightful ability to solve problems through product design and space planning concepts has made us a respected leader in manufacturing furniture solutions – products that skillfully support the success of customers in the business, education and healthcare markets.

Today, we've grown well beyond our folding chair origins and offer a broad portfolio ranging from seating and tables to architectural walls and panel systems. Our award-winning innovations reflect a desire to meet your objectives, be your go-to resource and build an enduring relationship with you.

This foundation and a strong market understanding is why KI customers throughout the world continue to rely on our trusted expertise to create solutions that fit their environments. That's why we say we offer far more than furniture...
We're Furnishing Knowledge.

In 1941, when Krueger Metal Products, Inc. was founded in Aurora, Ill., the war effort made manufacturing resources scarce. On a daily basis, founder Al Krueger would call on steel companies to purchase materials to manufacture the company's first folding chairs. The scrap materials available determined what he could produce...a novel and flexible way of manufacturing. We continue that tradition today as an environmentally conscious corporate citizen.

What Makes Us Different

Even though we are a furniture manufacturer, it's not how we view ourselves. Rather, we believe our job is to gain an understanding of our markets and bring knowledge to the table.

We want to hear what you have to say about your goals, how your employees or students want to work or learn, your expectations ... even what you want people to feel when they walk into your space. That way, we can help you make well-informed, educated decisions about your furniture investment. Following are a few more reasons customers keep coming back to KI for furniture solutions.

EASY TO DO BUSINESS

Whether you need help space planning, selecting surface materials, determining what furniture best fits your work style, or coordinating installation with other contractors, we're here to help.

CORE MARKET FOCUS

We stay laser focused on our core markets, persistently growing our knowledge, understanding and experience within each. That helps us design furniture solutions and support services that address the needs specific to:

- Higher Education
- K-12 Education
- Workplace
- Healthcare
- Federal & State Government

MARKET OF ONE® PHILOSOPHY

We believe the only customer who matters is you – you are our Market of One. So we've structured everything from our service and support teams to the manufacturing floor to be nimble and adaptable to your needs. We're the right place for furniture, service and fulfillment options that align with your brand, culture and work environment.

FULFILLMENT FREEDOM

We will gladly collaborate and coordinate with any partner, dealer and/or installation entity you choose. We do not prescribe to pre-set distribution channels. Rather, we allow you to determine the best means to manage ordering and fulfillment activities.

EMPLOYEE OWNERSHIP

KI is 100% employee owned and when you own something, you treat it differently. Everyone in the organization from the executive office to the production floor has a stake in the game.

DELIVERY AND INSTALLATION SERVICES

Delivery day should be exciting, not stressful. Should that date need to change for any reason, just let us know. We'll adjust accordingly.

Should you need assistance with fulfillment, KI offers a comprehensive service package. A factory-trained, on-site management team will oversee your project from initial pre-planning meetings through the final walk-through. Options for warranty and repair work as well as warehousing are also available.

LEASING OPTIONS

We understand furniture is an investment and that you want to be cost conscious when you leverage your capital. We offer a leasing program to help you align your financial goals with furniture procurement.

KI offers a variety of leasing plans through National Cooperative Leasing. To inquire, contact your KI sales representative or call 888.454.9796 for specific terms, conditions or additional information.

Personalized Solutions

While work tasks may be similar from business to business, we believe every customer is unique with its own brand, culture and ways of working. Your space speaks volumes not just about what you do, but who you really are. And we're here to help you make an impressive statement.

BEYOND THE BROCHURE

When the standard product offering doesn't quite support your way of working, learning or healing, ask us about: Infinity.

Infinity starts with a desire to find the most elegant solution to your unique challenge. Sometimes it requires a structural change to an existing piece to satisfy a specific need – creating a unique function, reducing a footprint or driving out cost. Other times it's creating a differentiating or proprietary solution

that's totally unique to your business, your space or your brand. Many times it's both.

WE EMBRACE CUSTOMIZATION

Through listening, observing and collaborating, then using our unique design and manufacturing capabilities, we're able to create personalized furniture solutions that fit your exact specifications and needs. We employ a scalable process to design and manufacture personalized solutions.

What's your Infinity?

Digital Tools

KI offers several digital tools and resources you can leverage 24/7/365 for specific information about your order or just ideas.

KI.COM

Our robust web site offers detailed product information, 3D symbols, market-specific thought leadership and application images, a variety of design specification tools, environmental and social responsibility information and a history of the company itself. The site aims to meet WCAG 2.0 guidelines, targeting Level 2 (AA) requirements.

MY KI AND LITERATURE ORDERING SYSTEM

KI.com also provides a personalized experience with "My KI," which allows you to save products and documents to your profile for easy access on return visits. Once you have a My KI profile, it's also easy to order literature and fabric/finish samples.

PRODUCT INFORMATION

The product pages on ki.com allow designers and specifiers to quickly find product information, including brochures, price lists, technical specifications, 3D symbols and more. In addition, product pages allow you to select a specific style and view the approved fabrics, finishes and accessory options.

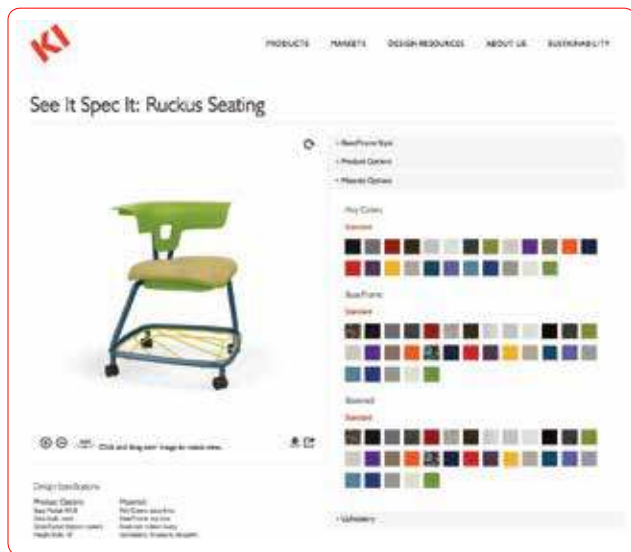

MARKET-SPECIFIC THOUGHT LEADERSHIP

KI.com houses a landing page for each of its core markets. These pages are where we share our insights, ideas and information specific to the Higher Education, K-12 Education, Workplace, Healthcare and Government markets. Each market page offers access to white papers, images, videos and more.

DESIGN SPECIFICATION TOOLS

To better visualize a product, KI offers SEE IT SPEC IT. This interactive tool builds a photo-realistic rendering of a product in real time as you select styles, options and materials. Once you have created your product, you can export the image as a JPG or the image and the selected options as a PDF; you can also share your creation on social media. The SEE IT SPEC IT program can be explored at www.ki.com/seeitspecit

ORDER STATUS

Order Status is accessed on the home page of ki.com and provides real-time status of your open orders. Log in using your 6-digit KI order number or Purchase Order (PO) number. You can then view order information using convenient search and sort functions, customize the data displays and set up multiple user log-ins for collaboration within your team. Access tutorial videos and FAQs right from the site.

EXTRANETS

If desired, we can develop a secured extranet for all team members to access product information, specifications and standards, pricing, drawings and more. This hub is helpful in project planning as well as post-installation when you may want to access care and maintenance documents, customer service contacts, etc.

KI BLOG

The KI Blog features insights on market trends, product launches, industry news, events and much more. Simply go to blog.ki.com to subscribe to monthly updates from KI's thought leaders.

WHITE PAPERS

Our product design is based on human-centered design. We are often in the field observing, interviewing and experimenting. In addition, our market leadership team is always researching and investigating how our furniture can support the way you work, learn, relax and heal.

We've compiled that information into several white papers to help you plan the perfect environment. Access in the market and literature sections on ki.com.

AUGMENTED REALITY/VIRTUAL REALITY

In certain situations, we can develop AR or VR vignettes to help you better envision how a product would look in a space or an entirely new space. AR/VR allows you to experience your environment in 3D spatial awareness in a way that 2D floor plans, elevations and renderings can't provide.

SOCIAL MEDIA

For what's new, what's now and what's next, engage with us on any of our social channels or follow [#DesignMoves](https://twitter.com/DesignMoves).

SPACES AND APPLICATIONS

Furnishing Knowledge Through Design

Design shapes how we see ourselves, drives emotion and ensures safety. Our approach to design uses platforms of simplicity, universality and connectivity.

Through human-centered design, we create compelling environments by aligning culture, brand and functional objectives. The ideas behind this approach include adaptive design, increased user control, higher levels of engagement and defining a balance between the basic workstyles (Focus, Interaction, Ideation and Regenerative), and behavioral needs of users.

Collections

Knowing many of our clients seek a visual consistency, we often take a collective approach to product design.

A design element – such as a shape or line – can be applied to different styles within a product line or translated across product categories. The “same but different” aesthetic allows you to seamlessly transition from a lobby to an office, a student union to a classroom, a waiting room to a patient room.
